

WELCOME ABOARD!

From CI Defence

New Product Information

Description:

Ultra-light sectional carbon fibre climbing pole

Applications:

Covert/overt access to elevated decks or floors.
Especially effective for use from RIBs.

Technical:

4 section pole, each section 2.4m long.

Weight per section: 3.8kg.

All carbon fibre construction except where otherwise stated.

Top section with permanently bonded titanium grapnel.

3m stainless steel wire rope ladder,
for attachment to bottom section of assembly

Note: this feature makes the pole especially useful when used from RIBs, allowing the boat to ride swell/wash without risk of damage to RIB from pole, or of displacing the grapnel from its hold.

Up to 4 sections may be assembled.

Max. length inc. ladder and grapnel - 13m.

The specially designed section-connecting system enables rapid pole assembly. Guaranteed 100% locking pin location, first time, every time.
